

About Bearings March 2010

Aside from the Tornado Platinum Tour Edition/T-3000 Split Bearings, only these three bearings are available from Valley Dynamo.

Figure 1 is a 1" snap-in bearing, part # 20515040. It is used on the Tornado Sport and Dynamo Blaster, and MAY fit older tables with a 1" sidewall that use a snap-in bearing.

Figure 2 is a 1½" snap-in bearing, part # 20515992. It is used on the Tornado Classic and Dynamo Big D, and MAY fit older tables with a 1½" sidewall that use a snap-in bearing.

Figure 3 is an old Dynamo Handle-side split bearing, part # 860120125. It has not been used in production for a number of years, and will be available only while supplies last.

Tornado makes no guarantees these bearings will fit a particular old model of table. Measure carefully before contacting your distributor.
